SUMMARY

Machine Learning-focused Artificial Intelligence & Data Science undergraduate with strong hands-on experience in building, training, and evaluating ML models. Skilled in data preprocessing, feature engineering, and applying supervised and unsupervised learning techniques to real-world problems. Experienced with Python-based ML workflows and practical project development in recommendation systems, NLP classification, and computer vision.

EDUCATION

Shree Ramchandra College of Engineering, Pune (Wagholi)

Bachelor of Engineering (B.E.) – Artificial Intelligence & Data Science

3rd Year | SGPA: 9.0 | 2023 – 2027

SKILLS

Machine Learning Algorithms

Linear & Logistic Regression, Decision Trees, Random Forests, KNN, Naive Bayes, K-Means Clustering

Model Development & Evaluation

Data Cleaning, Feature Engineering, Train-Test Split, Cross-Validation, Model Evaluation Metrics (Accuracy, Precision, Recall)

Natural Language Processing (ML-based)

Text Preprocessing, Tokenization, Bag of Words, TF-IDF, Text Classification, Spam Detection

Computer Vision (ML/CV)

Image Preprocessing, Object Detection, Real-Time Camera Processing (OpenCV)

ML Frameworks & Libraries

Scikit-learn, TensorFlow, NumPy, Pandas, OpenCV, Hugging Face Transformers

Programming Languages

Python, C++, JavaScript, TypeScript

Tools & Platforms

Git, GitHub, Jupyter Notebook, Google Colab

MACHINE LEARNING PROJECTS

Recommendation System

Built and evaluated a machine learning-based recommendation system using Python. Performed data preprocessing, feature extraction, and model evaluation to improve recommendation relevance.

Spam Detector (NLP)

Developed an ML-based spam classification model using NLP techniques such as tokenization and TF-IDF for feature extraction.

Smart Internship Matcher

Applied recommendation logic and ML concepts to match students with relevant internship opportunities based on preferences and profiles.

Object Detection System

Implemented an ML-driven object detection pipeline using OpenCV with real-time camera input.

Live Object Detection with Location Storage

Designed a real-time object detection system that stores detected object location data for further analysis.
